

monomial_basis

vector_interpolate

vector_interpolate
_generator::keep_going

```
graph LR; A[monomial_basis] --> C[vector_interpolate_generator::keep_going]; B[vector_interpolate] --> C;
```

The diagram illustrates a functional dependency where two separate inputs, 'monomial_basis' and 'vector_interpolate', are combined to produce a single output. The output is represented by a shaded box containing the text 'vector_interpolate_generator::keep_going'. Blue arrows indicate the flow of data from the input boxes to the output box.
